Can you share the link or doi of the "mantra" paper?

- <https://onlinelibrary.wiley.com/doi/10.1002/env.2877>

Is there a way to create one map which caters for all the diseases instead of 3, especially for scientific papers?

- We would imagine it's possible. We focused on these three, as they cover the majority of the colour blindness problems. The colour palettes could be calibrated for additional diseases. However, this has not yet been done, so it may be worth exploring in future work.
